

Dermal Fillers

A Safe and Non-Surgical way to prevent and reduce the appearance of fine lines and wrinkles.

LIFT
IT

Add volume to the
cheek area

SMOOTH
IT

Smooth moderate
to severe facial lines

PLUMP
IT

Add volume to the Lips

Over time, our faces naturally lose subcutaneous fat which causes skin to stretch, sag, and lose facial volume. The facial muscles are then working closer to the skin surface, so smile lines, crow's feet and wrinkles become more apparent. Other factors that affect the facial skin include sun exposure, heredity and lifestyle. Juvederm adds volume thereby giving you a younger, more youthful appearance.

What Dermal Fillers can do:

- > Define and refine lip contours
- > Improve the appearance of recessed scars
- > Improve shape under the eyes and the creases next to the nose
- > Reconstruct contour deformities in the face
- > Enhance shallow contours
- > Decrease or remove the shadow of the lower lids
- > Soften facial creases and wrinkles

Juvederm

What is it?

Juvederm brand fillers are all made of hyaluronic acid, a smooth, colorless gel that delivers volume to the skin without surgery.

How long does it take to work?

All fillers provide nearly instant results. There will be only minor changes in the days following treatment.

How long does it last?

The duration is variable and depends on the individual patient. However, the manufacturer states the product will last 9 months to 2 years.
