

# Lip Augmentation

A simple non-surgical, professionally administered treatment that gives you fuller, clearly defined, luscious, voluptuous lips.

If your lips are naturally thin and flat, or they've lost their definition - you can still have sexy, youthful lips with our Lip Augmentation Dermal Fillers.

- > Softer, fuller lips
- > Non-allergenic
- > Healthy full appearance
- > Used with topical anesthetic
- > Minor swelling and redness
- > Safe, quick treatment
- > Simple Procedure
- > Proven results
- > No recovery time

## Dermal Lip Fillers

### Fast

The average treatment time is 10-15 minutes. Many people get it on lunch break and then go back to work.

### Safe

Hyaluronic acids are naturally found in your body. They are non-allergenic and give your lips a healthy, full appearance.

### Effective

You'll see fuller, plumper, more luscious lips immediately after a temporary filler is injected.

## What results can I expect?

Your lips can be fuller, clearly defined and more inviting whether your lips have lost volume over the years, or if nature has you yearning for softer, more voluptuous lips. Today, more than ever, women - and some men - are asking about enhancing their lips for personal and professional success. Soft tissue fillers are temporary. After they are naturally absorbed back into your body, you will need additional treatments to restore fullness to your lips.

## Imagine a more beautiful you!!!!

Dermal Lip Filler injections are but one of many treatments we offer to revitalize your appearance. Please ask us about other anti-aging procedures to refresh and renew your natural beauty.
